

What is FIKS?

Fasiliti Inovasi Kitar Semula (FIKS) is an education centre on recycling, for the public to learn on the recycling process, waste recovery and waste treatment.

It aims to promote 3R (reduce, re-use and recycle) to Malaysians, as well as to help reduce recyclable waste sent to landfills.

It is also one of the initiatives by Alam Flora Group in support of the government's goal in achieving recycling rate of more than 40% by 2025 and the Sustainable Development Goals (SDG) by 2030.

At FIKS, public will learn about waste management and what we can do to help create a sustainable future. In line with FIKS' tagline "COME WITH A PURPOSE, LEAVE WITH A PLAN"

Great experience awaits you at FIKS, even if it was not your first visit.

Visiting slots are available for booking now!

"Come with a purpose, leave with a plan"

Alam Flora Group supports Sustainable Development Goals (SDG)

What's inside FIKS?

FIKS is built with recycled materials such as used shipping containers and wooden pallets, as to create a physical environment that educate public on the 3R concept.

The used shipping containers are refurbished and repainted in vibrant colours, to be part of the building structures in FIKS.

The roofs are made from ASB Roofing Material which is sound-proof and with Eco Green concept.

HAB ILMU

A learning and information hub on recycling and its processes. It can accommodate up to 15 people at one time.

3R BUTIK

A boutique that collects preloved clothes, to be sold at a very affordable price and are donated to charitable organisations.

BUY BACK CENTRE

A Buy Back Centre that buys recyclable goods before sending them to the Integrated Recycling Facility (IRF) and earning cash and rewards points as an incentive.

KOC ILMU

A library equipped with books on environment and general knowledge.

KOC KREATIF

An activity area for kids to play and learn. It includes fun and interactive games and learning tools.

INTEGRATED RECYCLING FACILITY (IRF)

A centre that receives, separates, and prepares recyclable materials to be processed by end-user manufacturers using contemporary equipment.

ANAEROBIC DIGESTER (AD)

It processes food waste under a series of biological process called Anaerobic Digestion of which, the food waste is broken down by the microorganisms (in the absence of oxygen) to produce biogas, electric and bio-fertiliser.

We will ensure that your enjoyment and learning experience are maximised when you are here at FIKS.
